CHICAGO.

CRICAGO, July L.—Fine weather, encouraging crop reports, and weak cables caused a weak feeling in the wheat pit to-day, but trade was slow not only in that but in all the other pits, operators not caring to take on new lines so close to the conjunction of Sunday and the Fourth of July. The market, however, was sleady at the decline, the extreme fluctuations covering a range of only \$6. for July and \$6. for the more deterred futures. Corn was weak early on the fine weather report, the fair crop prospects, and the weathers in the other speculative pits. Later it railied with wheat. Oats followed wheat and corn and closed unchanged. Hop products opened stendy at about yesterlays ctoring figures, but weakened with the grains and on realizing sales by longs. The break brought in a lot of buring orders and a raily followed, with the close slightly lower, except in ribs, which show a slight advance.

New Orleans, July 1.—The efficers of the steamer Alice, which reached this city last night report that the entire country along the Amiteriver, take Maurepus, and Port Vincent is under water; that in consequence of a freshet the Amiteriver, take Maurepus, and Port Vincent is under water; that in consequence of a freshet the Amiteriver has risen seven feet, and that the country from its mouth to Port Vincent, a distance of sixty miles, is under water from three to five feet deep. Business has been wholly suspended, mills have been stopped, and many families are leaving their homes for the hills. The crops are almost wholly destroyed, and there has been a very heavy loss in growing farm products, but most of the cattle and horses were saved from the overflow and driven to dry land. The principle trouble vrises from the Sarpy crevases, which has widened 125 feet since last Wednesday, 100 feet, so that a vast volume of water is now pouring over the country. The water at Sarpy has risen six inches, and unless the river scon falls it is more than likely that the Hilhoot Central will find that its openings are inadequate to carry off the main pertion of the Bood. Lake Pontchartrain will also have more than it can conveniently discentage without the aid of a west wind, so there is every danger that it will food the country back of New Orleans.

John street, MARY A., beloved wife of
Richard Brunner, ag 122 years.
What shall we say, dear Many,
After nursing so geatly, so true;
Five weeks of devoted attention,
And yet we must tell thee adieu?

Many dear, your place is empty; No mortal ever to fill will dare.

No mortal ever to fil will dare.
No truer heart was ever committed
To a husband's affectionate care.
The apple of an aged father's eye,
Three brothers a sister adored.
And yet with all our fondest care
Our prayers are but ignored.
